

# “Emerging psychosocial hazards: The new world of work”

Prof. Andrew Thatcher, University of the Witwatersrand, South Africa

24 July 2019

# What are psychosocial risks?

- Problems with work design, work organisation, work management, and/or social context of work
- Risks lead to work-related stress, burnout, or depression
- Risks include:
  - Excessive psychological or social workload
  - Conflicting demands or lack of clarity
  - Ineffective communication or support
  - Psychological harassment

# Four main emerging risks

1. Emergent forms of employment contracts
2. Work intensification
3. High emotional demands at work
4. Issues with work-life balance

# 1. Emergent forms of employment contracts

- Fall into two categories: precarious work and irregular hours
- PRECARIOUS work: temporary, on-call, outsourced, day-hire, and even self-employment
- IRREGULAR HOURS work: part-time, flexitime, zero-hour contracts, overtime, compressed work week
- Not always risks, sometimes there are employment benefits too

# 1. Emergent forms of employment contracts

## PRECARIOUS work

- Work continuity uncertainty
  - Low-level control over working conditions, working hours, income
  - Low-level social, unemployment, and discrimination protection
  - Insufficient remuneration for work demands
- 
- More likely for women; job sectors include retail, education, health, hotels, food services, migrant workers

# 1. Emergent forms of employment contracts

## PRECARIOUS work PREVENTION

- Better legislation to include precarious work
- Better social protections (e.g. unemployment benefits)
- Pressure on organisations to take responsibility

| 1. Employment protection gaps   |  |  |   |
|---|--|--|---|
| <b>Minimum standards gaps</b><br>(minimum wages, maximum hours, paid holidays, sick pay, pensions)                    | <b>Eligibility gaps</b><br>(employment status/age/length of job/hours or income thresholds)                        | <b>Upgrading gaps</b><br>(regulated pay progression in line with cost of living)   | <b>Integration gaps</b><br>(frAGMENTATION due to outsourcing; limited rights to move to stable contracts or change hours) |
| 2. Social protection & integration gaps   |  |  |   |
| <b>Entitlement gaps</b><br>(length of job/ hours or income thresholds)  | <b>Contribution gaps</b><br>(state subsidies - minimum out of work benefits/ in-work benefits/ employer subsidies) | <b>Integration gaps</b><br>(access to housing or credit linked to employment status & security as well as income)                |   |
| 3. Representation gaps  |  |  |   |
| <b>Institutional gaps</b><br>(lack of unions, works councils at workplace, social dialogue at sector or supply chain) | <b>Eligibility gaps</b><br>(lack of access to institutions due to employment status/ contract/ hours/ location)    | <b>Involvement gaps</b><br>(lack of organising efforts, or efforts to involve in institutions or access to managers)             |   |
| 4. Enforcement gaps   |  |  |   |
| <b>Mechanism gaps</b><br>(gaps in access, process, inspections, sanctions, whistleblower protection)                  | <b>Awareness gaps</b><br>(gaps in knowledge about rights, gaps in transparency)                                    | <b>Power gaps</b><br>(fear of loss of job or residency, fear of exclusion from unemployment support, lack of access to employer) | <b>Coverage gaps</b><br>(extent of unregistered workplaces, informal & illegal employment)                                |

# 1. Emergent forms of employment contracts

## IRREGULAR work HOURS

- Globalised world means greater work availability requirements
- Work hours unpredictability
- High working hours variability & low flexibility for choice
- More likely for men and younger people; job sectors include retail, construction, health & emergency services, hotels & restaurant services, transport

# 1. Emergent forms of employment contracts

## IRREGULAR work HOURS PREVENTION

- Better planning and scheduling
- Greater regularity
- Work design to account for variability in work intensity

## 2. Work intensification

- Three forms: quantitative, qualitative, emotional
- QUANTITATIVE: increased amount (cognitive/psychological workload), increased time requirements
- QUALITATIVE: increased complexity
- EMOTIONAL: increased need for emotional regulation
- Why?: Employer demands for productivity efficiency, performance management, customer demands for immediacy

## 2. Work intensification

- Technology expectations, mechanisation & automation
- Globalisation and global competitiveness
- Deadlines & reaction times shorten, demand for flexibility & diversity (in solutions and in the organisation) increases
- Greater worker isolation as they spend more time working and less time interacting
- Job sectors include education, retail, service industries, mental health industries, finance

## 2. Work intensification

### WORK INTENSIFICATION INTERVENTIONS

- Better work design to match work demands to work resources
- Matching imagined (by managers) workload to actual and perceived workload
- Greater control to workers to manage work rhythm (when to take breaks)
- Greater flexibility about work execution and decision-making latitude

### 3. Emotional work

- Requires the production of a desired emotional state in another person
- Display emotional reactions that meet the needs of clients, colleagues, or managers (often requires control of own emotions)
- Face-to-face and voice-to-voice contexts
- Emotional dissonance when own emotions don't match desired emotions
- Job sectors include: call centres, service industries, health industries

### 3. Emotional work

#### EMOTIONAL work INTERVENTIONS

- Job design to allow part of working time to express own emotions (e.g. “time outs”)
- Social support (team meetings, third party interventions by counsellors or therapists)
- Training in handling emotional work and transference
- Careful selection for emotional containment attributes

## 4. Home-work interference

- Where work challenges spill over into non-work activities
- Enabled by mobile technologies
- Exacerbated for dual-income families, single-parent families, migrant workers, workers with long commutes to work, workers who have to travel
- Job sectors include: most service industries, most sales industries, most technical support industries

## 4. Home-work interference

### HOME-WORK INTERFERENCE INTERVENTIONS

- Childcare support facilities
- Working-hour policies; ICT after-hours policies
- Facilities that support non-work activities: gym, commuting assistance, shops, medical and dental facilities, restaurants, etc.
