

Enquiry Details	Response/Outcome
You requested a configuration with 32GB of RAM, but unfortunately, it's not available.I would like to confirm whether the 36GB RAM would be an acceptable substitute for the 32GB RAM that was originally requested.	.We have noted your concern that the 32G is not available , however after consultation with the end user , it has been confirmed that we will proceed with the initial specification as advertised.
1. Latest version of Adobe Masters collection (x3) 1. Do your need 3 subscriptions for 5 years or is it on subscription for 5 years?	Response :1.One subscription, but it must be installed in 3 separate machines to cover a five-year period or any period which would be more than two years.
2. Latest version of Adobe Stock Images with a maximum of 5 downloadable images per month (x3) 2. Do your need 3 subscriptions for 5 years or is it on subscription for 5 years?	2. One subscription, but it must be installed in 3 separate machines to cover a five-year period or any period which would be more than two years, and yes we would like each person from the 3 MacBook users to download 5 images per month, which would be 15 images
<b>. Software Requirements</b> 1 Could you specify the exact software applications required? 2 Are there preferred vendors that meet your standards?	1.The software's we need as stated are the masters collection as we need all the applications 2. Are there preferred vendors that meet your standards? NO
<b>. Licensing Details</b> 1. Is perpetual licensing (one-time purchase) or subscription-based licensing (annual/monthly) preferred? 2. Will licenses be required per device or user (e.g., 50 devices vs. 50 users with multi-device access)?	1.We would appreciate it if it can be a renewable licence, annually or more than that. 2.As we are buying two MacBook's, already we have one Desktop mac, so we need licenses for 3 machines
<b>3. Compatibility &amp; Integration</b> Are there macOS-specific compatibility requirements (e.g., software optimized for Apple Silicon M-series chips)?	We would appreciate a fast paced running machine.
